

GROWTH THROUGH INNOVATION

REFRIGERATION UNITS

DTS offers a comprehensive range of refrigeration units, designed and built to the highest industry standards.

- All units are fully pre-wired which includes isolation switches, contactors and overloads.
- Condensers are treated with a protective coating to help safeguard against corrosion when units are located in coastal areas.
- Every new unit can be fitted with a HeatPro hot water recovery unit to take advantage of the free waste energy.
- DTS supplies high quality refrigeration units sourced from industry leaders whose refrigeration products have been tried and tested by New Zealand's dairy industry for over 30 years.

Although the information presented in this Product Information Sheet is believed to be accurate and reliable, no responsibility for inaccuracies can be assumed by DTS Limited. Performance data is typical only and variations due to component manufacturing tolerances are normal. DTS Limited reserves the right at any time to change performance characteristics or specifications without prior notice.
